uPVC Pipes are ideal and safe for pure water supply for domestic, household, commercial and industrial usage. This pipe is useful to provide regular cold water connections from water tank to various outlets. Internal surface finish of Supremo uPVC pipes is smooth enough that helps in reducing the friction loss and easy water supply.

Applications

- Used in houses, flat, commercial complexes, offices, hotels, hospitals, bus stations, railway stations and airports.
- Ideally used for regular cold water connections in bathrooms, kitchen sinks, washbasin and laboratories.
- Water supply in various industries, agriculture, telecommunication, irrigation & projects etc.

Supremo uPVC Column Pipes are used for submersible boring applications. It is specifically designed to withstand against considerable shock and jerk load during water evacuation and ejaculation operation. These pipes are available in different depths.

Applications

- Supremo uPVC Column Pipes are used for submersible boring applications.
